NEW HAVEN NURSERIES

54th Annual Catalog
1927

J. BAGBY & SONS COMPANY
NEW HAVEN, MISSOURI

Ready for the Express Office

The Way We Do Business With You

Terms Cash, unless otherwise agreed upon. All orders to be sent C. O. D. must be accompanied with one-fourth the amount in Cash. Remit by Money Order, Registered Letter or Check.

Order Early It is important that you order early. For the benefit of customers who wish to order early, but do not care to spare all of the money when the order is sent, we will accept such early orders if 10 per cent of the amount is sent with order. We will reserve the stock for you. Balance to be sent when you order the stock shipped.

Directions for Ordering Write name and address plainly. Always state distinctly the sizes and grades of stock ordered as per the grades given in this list. When named varieties cannot be furnished, we reserve the right to substitute such varieties as will fill the season as near as possible, unless prohibited in the order. Persons unacquainted with the different varieties will generally get a much better selection by leaving the assortment to us. Keep a correct copy of the order, so that when the stock arrives you will know exactly whether you get what you have ordered. If we make mistakes, they are accidental, and we wish to right them.

Prices The prices are for the quantities named, but five, fifty and five hundred will be supplied at ten, hundred and thousand rates respectively—i. e., five at half the price of ten; fifty at half the price of one hundred, and so on.

Packing All goods are packed free. Notwithstanding this fact, we use the utmost care and pack according to the distance and our customers' best interest. Everything is correctly labeled.

Our Guarantee The fact that nurserymen, planters and fruit growers of the country have ordered of us year after year, is as good a guarantee as can be given by any other nursery of over fifty-four years' standing. But if any mistakes occur we will cheerfully rectify them.

True to Name We use the greatest care possible to have our stock true to name, and should any not prove true, we stand ready to replace it free of charge, or to refund the purchase money, but do not hold ourselves liable for any greater amount than the first cost of stock that may prove not true.

All shipments of trees will be accompanied by **Certificate of Inspection of the State or Government Entomologist**. Good stock, true to name, sold direct to the planter at reasonable prices is our aim.

Our Location Our location is the very best for producing well ripened stock with splendid roots. Our facilities for prompt shipments are first-class.

NEW HAVEN is on the Missouri Pacific Railroad and also on the Missouri River, sixty-seven miles west of St. Louis.

We solicit correspondence and personal inspection of our stock, confident that it will compare favorably with the best.

NEW HAVEN NURSERIES

J. Bagby & Sons Co.

NEW HAVEN, MISSOURI

JUST ABOUT OURSELVES

ALL OF THE TREES we offer are grown right here on our own land and under our own care. We are proud of our record of the orchards that are growing in every state from the trees we have produced. Some of our customers have been with us for more than forty years, and we expect to keep right on serving a larger circle of new customers every year with **Bagby** quality trees. This list contains only the standard, time-tried and tested varieties.

Over fifty-four years of experience in the nursery business has taught us that our customers like our way of doing business, for they know that we do not exaggerate the merits of our varieties. We produce good stock, true to name, pack it well, ship it promptly and in good condition, and charge only reasonable prices. Let us fill your order.

"What Shall I Plant?"

So many ask, "What should I plant in my locality?" that we will here name a few of the popular and profitable sorts for general planting.

APPLES

Jonathan, Delicious, Mammoth Black Twig, Gano, York Imperial, Stayman Winesap, Rome Beauty, Winesap, Grimes' Golden, Maiden Blush, Yellow Transparent. This is our Commercial List. Others would add, perhaps, **Ben Davis, Duchess of Oldenberg, etc.** All of the above are good, profitable sorts, both for home use and market.

PEACHES

If you want to market your fruit, avoid planting too many early sorts. **Elberta, J. H. Hale, Carman, Champion, Captain Ede, Heath Cling, Krummel, Gold Dust, Belle Ga. and Crawford** are all profitable for market. Should early sorts be desired, **Mayflower and Greensboro** are what you should plant. Plant **October Beauty** for best late yellow cling. If for home use, plant general assortment, including above, for a succession. The peach tree should have shoots and branches shortened every year or two. The land should be kept in a high state of cultivation.

PEARS

Kieffer and Garber will stay in the lead for profit in the Mississippi Valley states. **Duchess and Bartlett** can be profitably planted farther west. **Koonce** is the best early pear. **Seckel** is the best mid-summer variety.

CHERRIES

Early Richmond, Dyehouse, Montmorency (Sour), Governor Wood, Elton and Magann (Sweet) do very well and are profitable. For general planting we do not recommend the **English Morello.**

PLUMS

Wild Goose (Native), Common Damson, Shropshire Damson, German Prune (European), Abundance and Burbank (Japanese), are all good bearers and profitable. We consider the **Abundance and Burbank** the best of the well-known Japanese sorts. **BLACK BEAUTY IS THE BEST OF ALL.**

WHOLE ROOT TREES

All our Apple, Pear, Peach, Plum and Cherry trees are grown on "whole roots." Our Apples are grafted and planted so that the scion also roots. Don't pay extra prices for "trade-marks." We give our customer the **very best**, and we don't ask **two prices.** A trial order will convince you. In planting our trees, you set the best that experienced and skilled labor can produce.

OUR SHIPMENTS

Our shipments for 1925-1926 went to practically every state in the union. We do not claim you should plant "**Bagby**-grown or none at all," but we do want to impress on you the fact that there are **NONE BETTER.**

APPLES

The first fruit, both in importance and general culture, is the Apple. Its period, unlike that of all other fruits, extends nearly or quite through the year. By planting judicious selections of summer, fall and winter sorts, a constant succession of this most desirable fruit will be obtained. Apple planting can never be overdone.

Our apples are all grown on Missouri river upland, on well-branched, whole roots, smooth, clean and well grown in every respect. **No better trees can be found anywhere.**

2-year, 5 to 6 feet, well branched, select.....	.60	5.00	40.00	350.00

SUMMER APPLES

BENONI—One of the best summer sorts. Red striped. Flesh yellow, tender, pleasant. Core small. Tree vigorous and upright.

CAROLINA RED JUNE (Red June)—Medium size; red, flesh white; last of June. Tree is very vigorous, upright, an early and abundant bearer.

DUCHESS OF OLDENBERG (Russian)—Medium to large size; skin yellow, streaked with red, somewhat blushed. Productive. August.

EARLY HARVEST—Medium to large, bright straw color; flesh white. Tree moderately vigorous and productive. First of July.

LIVELAND RASPBERRY—Fruit good sized, clear, waxen, white striped and marbled crimson; flesh snow-white, often tinged pink next to the skin, a very popular early summer variety. Blooms late, is blight-resistant, bears early, makes a good filler.

YELLOW TRANSPARENT—This valuable apple is said to be of Russian origin. We find it to be a valuable addition to our list. Medium to large; nearly white.

FALL APPLES

MAIDEN'S BLUSH—Rather large, evenly shaded red cheek or blush on a clear pale yellow ground; bears large crops. August and September.

GRIMES' GOLDEN—Medium to large; rich golden-yellow; flesh tender, mild, sub-acid. Should be gathered before turning yellow and put in a cool place, and often keeps until February. Tree hardy, vigorous; an early and abundant bearer. October to January.

WEALTHY—An apple of fine appearance and quality; an early and profuse bearer; a good market apple of its season. Tree hardy. Ripens here in August. Winter apple North.

Delicious

WINTER APPLES

Yellow Transparent

BEN DAVIS—Fruit medium to large; red striped; flesh white; an excellent variety. Tree very hardy; a free-grower, coming into bearing early and very productive; December to March.

DELICIOUS—A remarkably popular variety in the West, and rapidly taking first rank both for commercial and home orchards in all the apple-growing sections of the country. Fruit large, nearly covered with dull dark red; fine-grained, crisp, juicy; quality best; a splendid keeper and shipper; vigorous grower.

HUNTSMAN'S FAVORITE—Originated in Johnson county, Missouri. Very large; golden-yellow, with bright red cheek; nearly sweet, fine flavor, very aromatic. One of the best and highest selling market apples; tree very healthy and productive. November to January.

GANO (Black Ben Davis)—This apple was introduced to the public in 1886. Tree very hardy; it bears very young. Fruit bright red on yellow ground, no stripes; large; oblong, tapering to the eye; surface smooth, takes a very high polish, making it valuable as a stand fruit; flesh white. Annual, early, prolific bearer.

WINTER APPLES —Continued

GENETON (Rawle's Janet)—Medium, roundish, greenish-yellow, striped with red; rich and juicy; one of the best and longest keepers in the South and Southwest; valuable for its high quality and its late blooming; moderate grower. January to March.

INGRAM—A seedling of the old Janet. Originated near Springfield, Mo. Its habits are similar to the Janet, but the tree is a more upright grower and the apple is not subject to crack. Size medium; striped bright red in the sun; flesh greenish-yellow, agreeable, sub-acid flavor; a good keeper. Tree hardy, late bloomer; very productive.

JONATHAN—One of our earliest and best bearers. Brings fancy prices. Extra long-life tree. Fruit a brilliant glossy red, with spicy rich acid flavor. Succeeds everywhere. A firm apple, crisp, tender, and juicy. A great commercial apple and a splendid family sort.

Jonathan

MAMMOTH BLACK TWIG—Supposed to be a seedling of the Winesap, but tree a better grower and fruit much larger; or, in other words, an improved Winesap. Tree a fine, upright spreading grower.

MINKLER—Bright red cheek. One of the very best late keepers. Seedling of Little Red Romanite.

ROME BEAUTY—Large, yellow shaded with red; tender, juicy, sub-acid. October to February.

STAYMAN WINESAP—Not quite so well colored as Winesap, but larger; splendid quality; a good keeper. Valuable for market or home use. A vigorous grower and adapts itself readily to different soils and conditions.

2-year-old Apple Trees
in the Nursery Row

St. Louis, Mo.
The trees you sold me last fall
are all living and doing nicely.
F. G. O'CONNELL.

WINTER APPLES —Continued

WINESAP—Medium, dark red; a favorite market variety in the West. November to April.

WINTER BANANA—Fancy market fruit; large, pale yellow, pink blush. Tree a strong grower.

YORK IMPERIAL—This apple has been gaining favor, and is being planted largely in the West as a commercial sort. Large, smooth, yellow, shaded red, with indistinct red stripes.

CRAB APPLES

Prices for Crab Apples are the same as for other Apples

TRANSCENDENT—Remarkably vigorous, growing to a good size, and immensely productive. Bears a little the second year from planting, and every year after, and produces good crops by the fourth year. The best of its class for cooking and eating; juicy and crisp. Skin yellow, striped with red. September to October.

Winesap

WHITNEY—Large, averaging 1½ to 2 in. in diameter; skin smooth, glossy green, splashed with carmine; flesh firm, juicy and rich. Very hardy, vigorous, handsome.

Searcy County, Ark., Nov. 9, 1926.

I received the 120 peach trees that you sent me November 3rd, and they are certainly a fine lot of trees. They have extra good roots and are better in size than I ordered.

OSCAR PREUSSER.

Randolph County, Ill.

Received the trees. They are a fine looking lot of trees. I am well pleased.

W. N. BEARE.

Jasper County, Mo., Nov. 9, 1926.

The bale of peach trees received promptly and opened up in good condition. Found them nice trees, good roots.

H. W. JENKINS AND SON.

Peoria County, Ill.

I received my Umbrella Catalpa yesterday. The trees are first-class and I am well pleased. I will remember you in the future if I need any more.

H. B. BRUNINGA.

St. Louis County, Mo.

I received the trees and sure was surprised that they were exactly like you said. I am very thankful for prompt shipment.

MAX WAGNER.

Pettis County, Mo.

My order of trees received in good condition. I am so pleased with the general appearance and uniform size of the trees. I want to thank you for getting out my order so promptly.

MRS. J. ELLA MORRIS.

Digging Peach Trees

PEACHES

We are "Headquarters" for **True to Name** Peach Trees in the West, and can supply in any quantity—the best **up-to-date market sorts**. Our Peaches are stocky, nicely headed, smooth, straight bodies, well rooted, on healthy peach stocks and free from any disease and true to name. Remember this when comparing prices with other establishments.

	Each	10	100	1000
2 to 3 feet, part branched.	\$0.20	\$2.00	\$15.00	\$140.00
Medium, 2½ to 4 feet, nice, well branched.25	2.25	22.00	200.00
First class, 3½ to 5 feet, nicely headed.40	3.50	30.00	250.00
Extra select, 5 to 6 feet.50	4.00	32.00	270.00

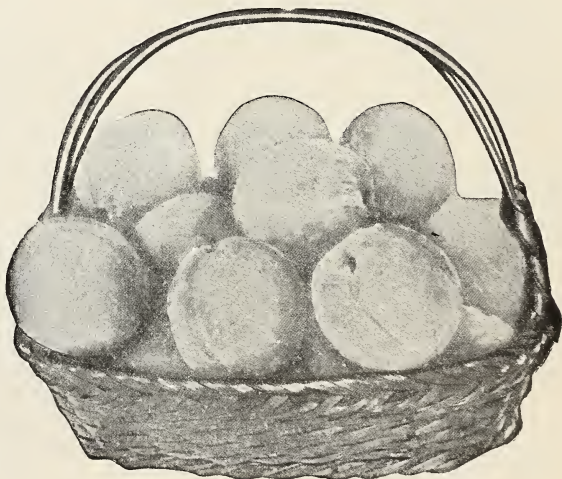

ALEXANDER—Large size, handsome and regular in form, with deep maroon shade; adheres to stone; should remain on the tree until fully ripe. White flesh. Early in July.

BELLE OF GEORGIA—Very large; skin white with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific; fine shipper. Ripens with Early Crawford.

CARMAN—White flesh, large with beautifully mottled red cheek. A valuable home or market sort. Season about fourteen days later than Alexander and about three weeks earlier than Elberta. Our stock came from the originator, and is true to name.

CHAMPION—Originated at Nokomis, Illinois. Fruit large, beautiful in appearance; flavor delicious, sweet, rich and juicy; skin creamy-white, with red cheek; freestone. August 15.

CHINESE CLING—The most popular Southern peach; shape is oblong, has creamy skin with faint flashes of red. August.

Elberta

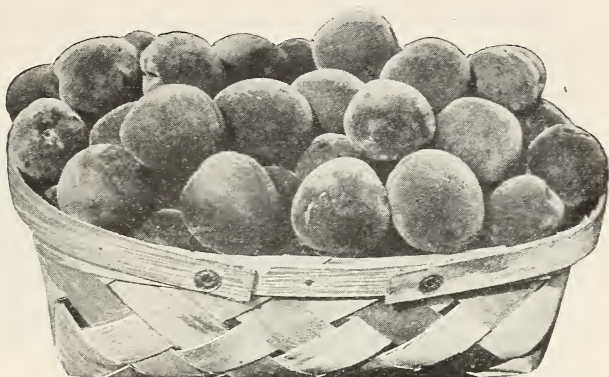

PEACHES —Continued

CRAWFORD'S EARLY—This beautiful yellow peach is highly esteemed for market purposes. Fruit very large, oblong; skin yellow, with fine red cheek; flesh yellow, juicy, sweet and excellent; free. Last of July.

CRAWFORD'S LATE—Fruit of the largest size; skin yellow, or greenish-yellow, with dull red cheek; flesh yellow; productive; one of the best freestones. August and September.

CAPTAIN EDE—Originated on farm of Capt. Ede in Illinois. Splendid yellow freestone variety. In appearance is very much like Elberta, its equal in every way, except not quite so large; better quality.

ELBERTA—A Georgia cross between Crawford Early and Chinese Cling; very large; well colored; all things considered, the finest yellow freestone in cultivation; no one can go amiss by planting it; the fruit is perfectly free from

Carman

rot, and is one of the most successful shipping varieties. August and September.

FOSTER—Same season as Crawford's Early; much more productive; yellow, with red cheeks; quality best; good size.

GREENSBORO—Large, oblong, greenish-yellow shaded red, flesh creamy; among the best; tree vigorous, prolific; grown largely in Georgia and the South for Northern markets. Ripe June 25th.

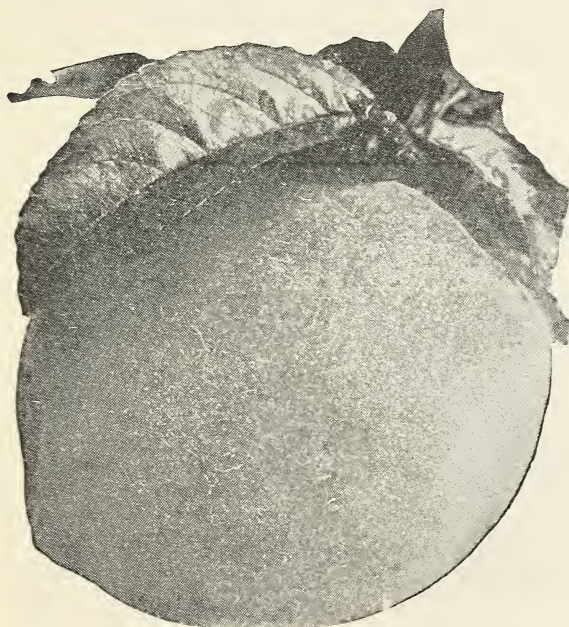

GOLD DUST—If you want the very best canning variety, this is the peach. Large yellow clingstone; juicy, productive and of best quality. Season, September 1st to 10th.

J. H. HALE—Ripens about August 20th. Yellow, finely colored; large, round, and of excellent quality. Freestone.

HENRIETTA (Levy) — Magnificent yellow cling, large size, slightly covered with bright crimson, hardy, productive, always commands fancy prices. September 25th.

HILEY—Ripens last of July. Yellowish-white skin with deep red cheek. Flesh is white and very juicy. Large size. Freestone.

HEATH CLING—Large, oblong, creamy-white, slightly tinged with red in the sun; very tender, juicy, melting; very rich and luscious. September 15th.

Gold Dust

PEACHES—Continued

KRUMMEL'S LATE—Ripens September 10th to 25th. Skin yellow, overlaid with crimson blush. Freestone. The fruit is nearly round, quite large. Flesh is fine-grained and has a delicious flavor. Krummel grows well in the northern and southern sections.

MILLER CLING—An extra large clingstone. Hardy, productive, and of best quality. Earlier than Heath Cling, but larger and better color.

MAMIE ROSS—Large, white, almost covered with carmine; flesh white, juicy, and of good quality. One of the best for family use and probably the best early commercial variety. Semi-cling.

MAYFLOWER—A beautiful "red - all - over" peach; handsome and of splendid quality. Extremely early. Tree hardy and healthy.

✓ **OCTOBER BEAUTY**—A late yellow cling. Originated on the grounds of Judge Hugo Muench of St. Louis. We recommend it as the best late yellow cling.

OLD MIXON CLING—Large, white flesh, with deep red cheek; rich and good; one of the best. August.

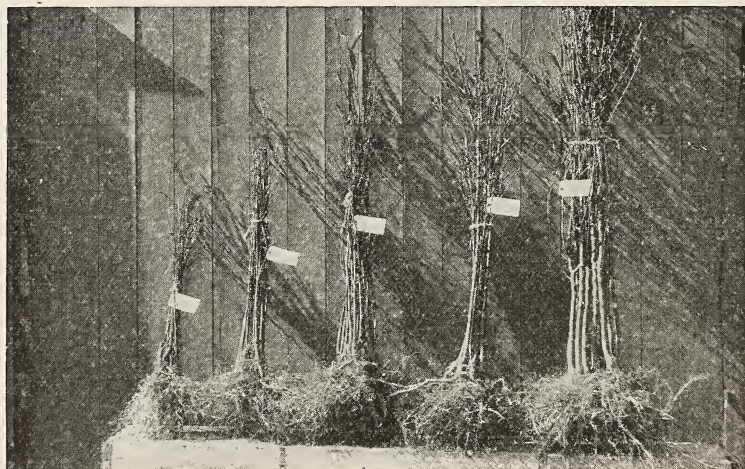

October Beauty

RINGGOLD CLING—A white cling. Much larger than Heath, and in every way an improvement on that popular kind. A very valuable peach. September.

PICQUET'S LATE—A variety of large size; yellow, with red cheek; flesh yellow; freestone. September.

PHILLIPS' CLING—Large; yellow; flesh clear yellow to the pit, which is very small; exceedingly rich and of high flavor. One of the best canning sorts. September.

We want all our customers to plant **OCTOBER BEAUTY**
(Late Yellow Cling) as the **LATEST** and **BEST**.
Medium size, high color and quality.

Showing Different Sizes of Peach Trees

PLUM TREES

	Each	10	100
First class trees, 5 to 6 feet	\$0.90	\$8.00	\$60.00
First class trees, 4 to 5 feet	.75	7.00	50.00
First class trees, 3 to 4 feet	.60	5.00	40.00

ABUNDANCE—A hardy, productive Japanese sort. Large, purplish-red; quality very best. Season, early in July.

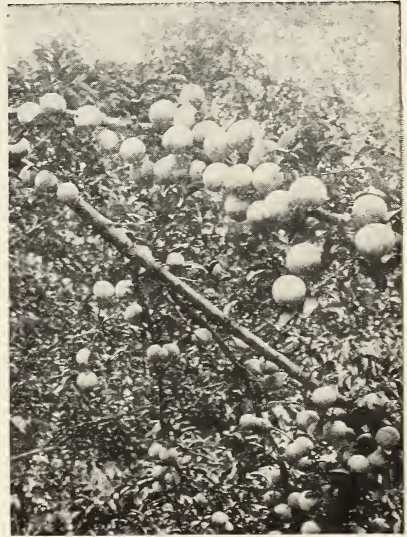

BLACK BEAUTY (New)—The best Japan sort we have ever grown. Large, very dark purple, almost black. Persimmon shape. Quality and size of Abundance.

BURBANK—Large, varying less in size than the other Japanese plums; it is nearly globular; clear cherry-red, with a thin lilac bloom; flesh deep yellow, firm and meaty; tree vigorous and productive. Last of July.

COMMON DAMSON—Well known and very productive. Season, September.

GERMAN PRUNE—Very profitable and will succeed wherever Common Damson can be grown. Very large. We consider it the best of European sorts. August and September.

LOMBARD—Medium, oval, violet-red; juicy, pleasant and good. Tree vigorous and productive. It is a valuable market variety; one of the most hardy and popular. August.

Burbank

The **BLACK BEAUTY** originated with us, and is a cross between the Damson and Abundance.

Henry Co., Mo.

We are sending you some kodak pictures of our Black Beauty plum orchard. These are the finest plums I ever saw. We raised about 150 gallons on six trees and sold 100 gallons in three days. Could have sold 500 gallons if we had had them.

J. S. HARTLEY.

SHROPSHIRE DAMSON—A plum of fine quality, sprightly. In market it has commanded nearly double the price of the common Damson; enormously productive. Last of September.

WILD GOOSE—Large, rich, crimson, beautiful; flesh soft, melting, delicious, with a full, fruity flavor. Tree a strong grower, prolific.

**For the Home Orchard
plant Abundance, Bur-
bank, Black Beauty,
Common and Shrop-
shire Damson.**

Clay County, Ill.

Trees received all O. K. Very well pleased with them.

HOBART RECTOR.

PEAR TREES

Our Pears are especially clean, smooth and well rooted, grown on XX French imported stocks.

	Each	10	100
Leading sorts, first class, 5 to 7 feet, 2-year.....	\$1.00	\$9.00	\$80.00
Leading sorts, 4 to 5 feet, 2-year.....	.80	7.50	70.00
Leading sorts, 3 to 4 feet, 1-year, very fine.....	.70	6.00	50.00

For Kieffer and Garber in quantities of 300 or more, write us for special low prices.

SUMMER PEARS

BARTLETT—Large, skin very thin, clear lemon-yellow, with soft blush on the sunny side; flesh white, buttery, very juicy and highly flavored. The best summer pear in existence for quality.

CLAPP'S FAVORITE—Large, pale lemon-yellow, marbled with crimson on the sunny side and thickly sprinkled with brown dots; flesh finely grained and melting with a rich vinous flavor. August.

KOONCE—The handsomest, best and most valuable; very early pear; tree vigorous, upright grower, free from blight; magnificent foliage, which it retains late in the season; fruit medium to large; skin yellow, does not rot at the core, juicy, sweet. Is an excellent shipper.

SECKEL (Little Sugar Pear)—Small, rich, yellowish-brown with bright red cheek. Juicy, buttery and melting.

AUTUMN PEARS

Kieffer

DUCHESS—Very large, greenish-yellow; sometimes a little russeted; makes a beautiful tree. One of the best. October and November.

FLEMISH BEAUTY—Large, beautiful, juicy, melting, rich and fine; strong grower and good bearer; hardy everywhere. September and October.

GARBER—Originated in Pennsylvania. Fruit is large and beautiful; color bright yellow, with red; juicy and good; delicious canned.

KIEFFER—Tree a remarkable grower, with so vigorous a constitution that it rarely blights. Fruit of fine size, rich color and good quality. Brings high prices in competition with other varieties. Best when picked at maturity and house-ripened. October and November.

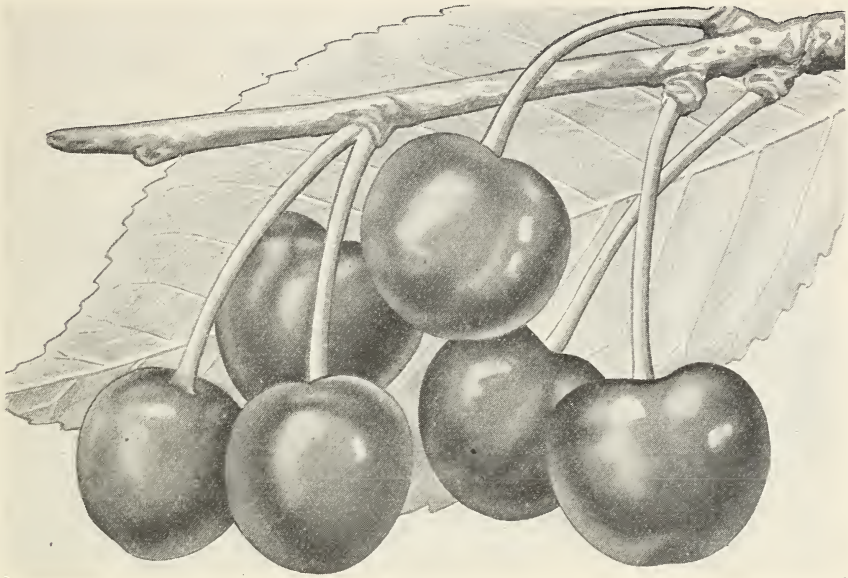

St. Louis County, Mo., Mar. 22, 1926.
Fruit trees arrived in good order and am pleased with them. Thank you for the extras.
HENRY REINEMER.

Cole County, Mo.
We had fine luck with the trees purchased from you last spring. We have only two dead ones out of 526 and many of the trees have made as much as four feet of new growth. We are proud of our orchard start.

A. KAUFFMAN.

Pulaski County, Mo.
Trees received and they are in excellent condition and are a good lot of trees. I want you to know I am well pleased.

H. L. VEASMAN.

Montmorency Cherries

CHERRIES

There are few more desirable fruits than Cherries, and they can be grown for market with great profit. Along the street or avenue as ornamentals, especially the Heart and Biggarreau varieties are strong, vigorous growers, with large, glossy leaves and open, spreading heads, making a fine shade. Cherries thrive in almost any well drained soil. The fruit is equally delicious whether eaten from the tree or preserved, and it will always find a ready market at profitable prices.

Our Cherry trees are all budded on Imported French Mahaleb stock. They have fine roots and nice heads. All well rooted and will be graded full size indicated, and up.

	Each	10	100
Leading sorts, extra select, 2-year, 4½ to 6 feet.	\$1.00	\$8.00	\$70.00
Leading sorts, first-class, 2-year, 3½ to 5 feet.85	7.50	60.00
Leading sorts, first-class, 1-year, 3 to 4 feet.60	5.00	40.00
Leading sorts, well branched, 1-year, 2 to 3 feet.50	4.00	30.00

BELLE de CHOICY—An excellent variety. Fruit large, dark red, juicy, rich; almost sweet. Tree vigorous and productive.

DYEHOUSE—Very early and sure bearer. Ripens before Early Richmond; but not quite as productive. May.

ENGLISH MORELLO—Medium to large, blackish-red; acid; juicy. Very productive. Short lived. July.

EARLY RICHMOND (Kentish Virginian, or Early May)—Medium size; red; melting, juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is exceedingly productive. First of June.

GOV. WOOD—One of the best sweet cherries, very large, white with pink cheek, juicy, rich and delicious. Tree healthy and a great bearer. May and June.

MONTMORENCY—One of the finest acid cherries; tree very hardy and an immense bearer; commences to fruit while young and is loaded annually thereafter with fine crops; fruit of good size; fine flavor, and of bright, clear, shining red; valuable everywhere, especially for Northern latitudes; larger than Early Richmond, and fully ten days later. Season, end of June.

MAGANN CHERRY—A new sweet cherry. Fruit large, almost black when fully ripe, growing in large clusters. It will pay you to include some of these in your order for other stock.

For Middle West we suggest as best commercial sorts in Cherry—Richmond, Montmorency, Magann. For larger assortment include Dyehouse, English Morello, Governor Wood.

STRAWBERRY PLANTS

Prices of Strawberry Plants, for spring shipment only: Selected plants, \$1.25 per 100, by parcel post prepaid. \$6.00 per 1,000, by Express, f. o. b., New Haven, Mo.

Large orders must be sent by express. Small orders carry safely by mail. They do not carry well by freight.

AROMA (Per.)—Plants large, very vigorous and perfectly healthy. Makes plants just right for a good fruiting row. The blossom is rich in pollen, a good fertilizer for Sample, Bubach and Enormous. Fruit large to very large, roundish, conical, smooth and perfect in form, of a beautiful bright glossy red in color, very firm, and of excellent quality. Will give splendid results on any soil that will grow a good crop of corn or potatoes. It is nearly as late as Gandy, of long season. Three times as productive and a sure cropper every year. During the past five years the demand for plants of this variety has been very heavy and we have never been able to grow plants enough to meet this demand.

SENATOR DUNLAP (Per.)—A well-tested, wonderfully productive variety, one of the safe sorts to plant everywhere and sure to take a high place among the prominent standard sorts. Plant resembles Warfield, rampant runner, should be restricted in its production of plants; fully equal to Crescent and Warfield in its ability to succeed under all circumstances. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper, excellent quality. One of the best for canning; ripens early and continues a long time. It promises to stand at the head in its wonderful ability to ripen a good crop, under almost any condition of drought or neglect.

GENERAL INFORMATION

Over fifty-four years have been spent in building up our nursery business here at New Haven. It was established in 1872 by Julian Bagby, the father of the present management. Our employees have grown up in the business and are honored citizens of the community, and some have been with us over forty years. We state this fact that our customers may know that their orders are handled by responsible men.

ABOUT AGENTS

This Price List is our Agent, but we shall be pleased to have you get a club among your neighbors, and on club orders amounting to \$100.00 or more, at single or ten rates, we allow you 10 per cent additional in stock. We put up each order in a separate package, so that upon receipt of goods you have only to hand out the different lots as ordered. Many of our best customers buy in large quantities at the lowest rates and distribute in lots as ordered by their neighbors.

We also desire to sell to nurserymen and dealers who buy to sell again, and special prices will be made on carloads or larger quantities than indicated in this list.

REFERENCES

We refer you to any bank or business house in New Haven, Mo., as to our responsibility and standing in the community. We do our local business with the Farmers' Savings Bank, New Haven, Mo.

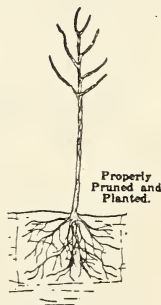

DISTANCES FOR PLANTING

Standard Apples.....	30 feet apart each way
Standard Pears and Strong-growing Cherries.....	20 feet apart each way
Duke and Morello Cherries.....	18 feet apart each way
Standard Plums, Apricots.....	18 to 20 feet apart each way
Peaches, Nectarines.....	18 to 20 feet apart each way
Dwarf Pears.....	10 to 20 feet apart each way
Grapes.....	rows 10 to 16 feet apart, 7 to 16 feet in rows
Currants and Gooseberries.....	3 to 4 feet apart
Raspberries and Blackberries.....	3 to 4 by 5 to 7 feet apart
Strawberries for field culture.....	1 to 1½ by 3 to 4 feet apart
Strawberries for garden culture.....	1 to 2 feet apart

NUMBER OF TREES ON AN ACRE

30 feet apart each way.....	50
25 feet apart each way.....	70
20 feet apart each way.....	110
18 feet apart each way.....	135
15 feet apart each way.....	205

Rule—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill; which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.

Proper planting and cultivation with correct pruning is the best insurance on an orchard.

A FEW WORDS FROM OUR CUSTOMERS

Guernsey County, Ohio, April 19, 1926.

My trees arrived in good shape and am very well pleased with them. You will hear from us again.

H. H. FLOYD.

Callaway County, Mo., May 1, 1926.

Trees arrived in nice shape yesterday. Was a nice bunch of trees, but in thirty-two years of buying of you, have never gotten anything else.

JAS. O. ERWIN.

Polk County, Mo., Feb. 18, 1926.

Several years ago I sent you an order for trees and they have all done splendidly. I have had peaches that were as good as those you see in the catalogue.

E. E. HEARNE.

Wayne County, Ill., Feb. 18, 1926.

The five hundred Elberta peach which I bought of you Spring 1920 are all living and in fine shape, and all bore some last year and proved true to name, not even a straggling seedling among them.

CHAS. JOHNSON.

St. Clair County, Ill., Feb. 18, 1926.

Have you any Green Gage Plum? I would rather get my few trees at New Haven Nurseries for I got trees last spring and not one died. They sure did do well.

JOHN J. RYAN.

Butler County, Mo., Nov. 20, 1926.

Received my shipment of trees O. K., in fine shape. Well pleased. Will send another order before spring.

JIM LEWIS.

Acadia County, La., Jan. 14, 1926.

This is to inform you that I have received the trees you expressed to me recently. The trees are such as I wanted. They are healthy and of fine shape; even the packing was first class. I thank you for your prompt delivery. I purpose to demonstrate to the people here that we can grow fruits in this part of the country. Wish you success in your honorable calling.

P. J. ROBIDAUX.

Alfalfa County, Okla., Jan. 21, 1926.

I have found your trees to be satisfactory, for all of my trees are from your nursery.

JOHN F. PARR.

Clay County, Mo., March 1, 1926.

I am sending you a small order. I received my trees in fine shape last fall. I want to say that the trees were the finest I ever received.

W. S. KNIGHTON.

Callaway County, Mo., Mar. 30, 1926.

Received fruit trees in perfect condition and was well pleased. When I want more trees, you will get my order.

ROY LEE BRANDIS.

St. Charles County, Mo., Mar. 1, 1926.

I have 24 apple trees that I got from you and I never lost one. I have never seen trees do so well; thrifty as can be. I am well pleased with your fruit trees.

BEN KERSTING.

Coffey County, Kan., Mar. 17, 1926.

The fruit trees ordered from you 1925 grew just fine. I was well pleased. Trees from your nursery come up to any of the trees grown in this country. I am now ordering more stock. Please rush this order.

PETER BURGER.

Coffey County, Kan., Mar. 23, 1926.

Received plants and trees in good order. They sure are a nice bunch of plants, nice fine roots on them. We also thank you very much for the quick service you gave us.

PETER BURGER.

Clay County, Ark., Mar. 2, 1926.

I received trees in fine condition; well pleased. They are fine trees.

MRS. FRANKIE RYAN.

Henry County, Mo., Nov. 6, 1926.

Trees are nice and came in good shape.

W. E. MONROE.

Jackson County, Mo., Nov. 8, 1926.

I received shipment of trees on November 5th, and delivered some of them on the 6th. All are well pleased with the trees and say that they could not get better trees anywhere else.

EMIL KONOW.

Linn County, Kan., Nov. 26, 1926.

I received the trees and was pleased. The others, three brothers, were highly pleased with their trees. Certainly a fine lot of trees.

VINSONS HARTWICK.

Johnson County, Mo., April 12, 1926.

I want to thank you for the fine lot of trees you sent me. They went beyond my expectations. You were very prompt with my order. The trees were packed exceptionally well, so there was not the slightest bruise. The quality is exceptional. I cannot speak too highly of your goods.

THEO. A. DOWLER.

Dickens County, Texas.

The trees came in perfect condition and I assure you it is a pleasure to receive such stock as I believe they were as near perfect as any trees I ever bought.

J. E. JOHNSON.

Franklin County, Ill.

Last year I purchased 500 peach trees from you. The trees were good stock and grew very well considering the dry weather. I did not lose exceeding ten trees.

M. C. INGRAM.

Middlesex County, Mass.

Stock arrived in good condition. They are sturdy trees with good root system.

GEORGE HEMINGWAY.

Utah County, Utah.

Trees came through in good condition and are the usual New Haven type.

B. H. BOWER.

Montezuma County, Colo., Feb. 27, 1925.

Just received my trees today and for good trees, good packing and quick service, they can't beat you. Many thanks for the good trees, good pack and quick service.

F. H. TAYLOR.

Tippecanoe County, Ind., Oct. 7, 1925.

We certainly were well pleased with all the stock you supplied us in the spring.

FRY BROTHERS NURSERY CO.

Calhoun County, Ill., April 2, 1925.

Received trees. They were in fine shape. Was well pleased.

ALBERT RINGHAUSEN.

Madison County, Iowa, April 10, 1925.

I received trees O. K. You certainly had them packed in fine shape and I never got nicer trees from anyone.

J. W. ROSEMAN.

Hillsborough County, N. H.

Trees arrived in splendid condition. You have a wonderful packer. I never received trees packed so carefully. I am well pleased. Trees are all healthy and well grown. Every tree you sent me last year is alive. I will try to send you a worth-while order next year.

JAS. A. WARNER.

Elberta County, Ga.

Am in receipt of my little shipment and I want to congratulate you on your thorough method of packing. I was very much pleased with the plants. Want to thank you for the extra tree.

T. J. MERCER.

DeWitt County, Ill., April 24, 1926.

Both lots of trees received and were in fine condition. Old Missouri can sure grow the trees. Other trees I have bought of you were the finest I had ever seen from any nursery, but this spring's shipment caps the climax.

C. N. COX.

DeWitt County, Ill., Nov. 15, 1926.

The shipment of trees reached me just ahead of a snow. The trees were moist and in good condition, and a fine lot of trees.

C. N. COX.

Cooper County, Mo., April 15, 1926.

I have dealt with you people thirty-five years and always found you straightforward. Always have a good word for Bagby & Sons.

L. S. GEIGER.

Saline County, Mo., Sept. 6, 1926.

I received shipment of trees from you spring 1925, and must say, for success, I have never seen the equal.

WALTER CHEVALIER.

Osage County, Kan., Aug. 31, 1926.

The little home orchard that I bought of you four years ago has done fine. Nearly every tree grew, and this year the peaches bore their first crop and I am pleased to note that every tree as far as I can tell, is true to name.

WM. BANTA.

St. Charles County, Mo., Nov. 22, 1926.

Received shipment of peach trees some time ago. I want to thank you for the splendid trees you sent, and also for the trees sent as premium. They are certainly fine and when in need of more, will give you the order.

AUG. F. BEIMDIEK.

Russell County, Ky., Nov. 23, 1926.

I want you to know how my fruit trees set last spring have done. Out of 300 I have lost two. Got fine growth.

J. H. PHELPS.

Sumner County, Kan., Nov. 16, 1925.

Order received. Trees sure fine, but did not have enough to fill the space. Please send me 25 more.

MRS. M. E. CLUM.

Fayette County, Pa.

My order for trees received in good condition and am pleased to say they are bigger and nicer trees than I expected and the best I ever received from any nursery, regardless of price. I shall certainly favor you with any orders I may need in the future.

H. J. BRITTON.

MISSOURI STATE PLANT BOARD

Office of the Chief Inspector, Columbia

Certificate of Nursery Inspection

No. IC 6

Issued 7-22-26

This is to Certify that in accordance with the provisions of the Missouri Plant Act of 1925, the nursery and premises thereof belonging to New Haven Nurseries of New Haven, Mo., have been inspected by a duly authorized inspector and were found to be apparently free of injurious insect pests and plant diseases.

This certificate is not transferable and may be revoked for cause. This certificate expires Sept. 1, 1927.

L. HASEMAN,
Chief Inspector.

We are prepared to fumigate all consignments to states requiring fumigation. No Scale or Yellows have ever been found in our establishment, and we take pride in sending out only clean, healthy stock.

SPRAYING

Spraying is a vital necessity if money is to be made from fruit. It doesn't pay to miss one season, even if enemies are not visible. Spraying has an invigorating effect on trees, besides controlling enemies.

There are three classes of enemies spraying will control—chewing insects, sucking insects, and fungi. Each class requires a different remedy, but the remedies can be combined most of the time.

Spraying during the dormant period is distinctly different from spraying on foliage. Materials several times as strong can be used and are needed to control the scales.

On account of the life habits of enemies, often only two to seven days are available for any one spraying. Do the work then. Put the material on with force and cover every inch of bark and leaf.

Get a sprayer that is big enough, that will give one hundred to two hundred and fifty pounds of air pressure, that is adapted to your land and trees, and that is durable. Get a power outfit, if possible, for it does better work than a hand pump can.

The spraying program ordinarily resolves itself into two, three or four applications—one while trees are dormant, with lime-sulphur solution, and the others on blossoms and fruit with self-boiled lime-sulphur, or diluted lime-sulphur, or one of the soluble oils, with arsenate of lead added, or maybe with Bordeaux and lead. All applications must be guided by careful study.

BORERS WILL ATTACK FRUIT TREES IN SPITE OF ALL WE CAN DO, and will kill many trees if left alone. Trees must be gone over several times each year, and should be gone over each April and August.

We Grow Our Own Stock

We mail this list of prices to our friends and customers, and will ask that they favor us with their orders as early as practicable. We have now growing in our nurseries over one million fruit trees by actual count. All clean and healthy. **ENTOMOLOGIST'S CERTIFICATE WITH EACH SHIPMENT.**

Shipments to Pacific Coast and Southern States from our frost-proof storage during winter months via Southern Routes.

WE ARE GROWERS OF WHAT WE SELL. Many nurserymen are simply jobbers in the trade, and cannot sell stock with the same certainty of being true to name and free from disease.

NEW HAVEN NURSERIES

NEW HAVEN, MISSOURI

You Order the Trees—We Do the Rest

PLANTING AND PRUNING

CARE OF STOCK

The bundles should be opened, the roots dipped in water, then heeled in moist ground so that the mellow earth will come in contact with the roots and thoroughly protect them from the air, having the earth tramped solid about them. When ready to plant, take up only a few at a time puddle the roots and do not allow them to lie exposed to the sun or air. The ground should be carefully prepared by deep plowing and firming down with a disc and harrow.

PLANTING

The holes for planting must be large enough to receive the roots freely, without cramping or bending them from their natural position. All broken or mutilated portions of the roots must be cut off so as to leave the ends smooth and sound. All trees should be planted about as they stood in the nursery row: **pack the soil very firmly about the roots**, being careful not to bark or break the roots. Leave three inches of the surface soil loose to serve as a mulch. If the ground is very dry apply one or two pails of water before this soil mulch is in place, and after the water has soaked away it can then be placed over the moist soil.

PRUNING WHEN PLANTED

All fruit trees require more or less pruning when planted, and thereafter from year to year. On Apple, Pear and Cherry remove unnecessary branches and cut back growth of remaining branches to insure good growth the first season. On Plum and Peach remove branches to within one inch of body of tree and cut back the top leader to the desired height for a new head. The usual rule with Peach and Plum is to prune to rough stick form as above to about three feet in height. The above instructions on pruning are for freshly planted trees only.

MULCHING

Unless thorough surface cultivation will be practiced during the summer a mulch should be applied. This may be a layer of coarse manure or vegetable matter around the trees three to six inches deep, and extending out from the trees three or five feet. Mulching protects the soil against the sun and drying winds; against alternate freezing and thawing, and provides some plant food.

SHRUBS

If planted in beds or groups the ground should be spaded deeply and well worked. If shrubs are set as individual specimens they should be planted the same as trees.

HEDGES

Privet—Dig trench about twelve inches deep and set the plants two to three inches deeper than they stood in the nursery row, or deep enough so the lower branches will be partly under the ground. Such planting will make a compact hedge down to the ground line, but if the plants are set too shallow there will always be undesirable open spaces at the base of the hedge. Privet and Spirea can be set about nine inches apart in the row.

TREATMENT OF NURSERY STOCK

That has Been Frozen in the Packages or Received During Freezing Weather.

Place the package UNOPENED in a cellar or some such place that is COOL but free from frost, until completely thawed. DON'T be in a hurry to open. The stock can remain in the packages for TWO WEEKS OR LONGER if necessary, without injury. If boxes are covered with sawdust, earth or something to exclude the air, it will be better.

After the FROST is ALL OUT the stock can be opened up and treated as above.
